Podiatry

A podiatrist is a health professional who is trained to assess, diagnose, treat and manage problems of the feet and lower legs.

Podiatrists can:

- check blood flow and feeling in your feet
- perform surgery on ingrown toenails
- manage ulcers on your feet
- check how you walk
- check the skin and nails on your feet
- prescribe pressure-relieving insoles or arch supports (orthotics)

How can a podiatrist help?

- help you to look after your feet
- help with pain in the feet and lower leg
- talk about your shoe choices
- help people with diabetes look after their feet
- check children's feet and the way they walk
- help you treat foot ulcers and sores
- help with skin and nail problems on your feet

We do not cut toenails or remove hard skin.

What should I bring to my first appointment?

- your list of medication
- your medical history
- footwear that you wear regularly (including your work shoes, exercise shoes, casual shoes)
- any recent x-ray or ultrasound images of your feet

Who can use this service?
